Hoarding things	☐ Yes	☐ No	Making verbal sexual advances	☐ Yes	☐ No	Intentional falling	☐ Yes	☐ No
Making strange noises	☐ Yes	☐ No						

If you checked two or more of these behaviors, your loved one may qualify for a clinical research study that treats these symptoms.

By signing, the individual (either the potential participant or the caregiver/legal representative) understands and consents to the sharing of the potential participant's personal health information (PHI) with the study site(s) to determine eligibility for the clinical trial. The information will be kept private and secure.

The individual understands that consent can be withdrawn at any time.
